

## “OPS NORM” FLIGHT PROCEDURES

Points to note are;

- a. An ‘Ops Normal’ call is to be made each 30 Minutes after the initial 60 Minute requirement, to be then followed by the procedure laid down in the flow chart below;
- b. The Table is to be laminated and attached to the wall of the pie cart and clearly visible to the Log Keepers and Duty Instructor;
- c. The Radio Log Keeper is to record the OPS Normal calls within the radio log;
- d. This document is to be placed within the ERP and the DETCDRs course folder;
- e. This procedure is to form part of the course safety brief and pre-solo training;
- f. The designated Duty Instructor is to mentor and monitor this procedure on course;
- g. Students nearing solo stage must know this procedure and are to be assessed by the a QFI before solo flight is undertaken;
- h. All aircraft must have a VHF handheld on board (with a fixed operational radio), if the fixed radio is to fail, the hand held is to be used; and
- a. Where radio failures occur, aircrew are to terminate their flight and return to base.
